

JEFFERSON DAD VAIL REGATTA

WEATHER CONTINGENCY FOR BOATS ON WATER

In the event weather conditions require crews to leave the water and return to the docks, the following directions are to be followed:

Referees and river marshals will sound a warning horn and instruct all crews to leave the water and return to the docks.

Crews between the launch area (three angels) and Columbia Bridge must return to the launch area docks.

Crews above the Columbia Bridge/Finish line must disembark at the Saint Joseph boathouse docks or the docks just below them.

Any change from this procedure (to improve safety) will be given by the referee or marshal.

Racing will resume one hour later unless other instructions are given by the Chief Referee.

All crews must remain or have a crew member remain at the location they have disembarked. Additional weather information and race time resumption will be announced at those docks.
